**Monthly average dew point monitoring data set in south and southeast Asia (1989-2018)**

**Data Documentation**

I. **Dataset/atlas content features**

   i. **Abstract**
   
   The data set is calculated and interpolated by weather station data. The meteorological site data comes from NOAA, which includes data such as temperature, wind speed, and precipitation. The research team processes the daily weather station data into monthly data, and then interpolates through Kriging to form raster data covering the entire study area. The dataset shows monthly average dew point in South and Southeast Asia, providing a reference for users and further research.

   ii. **Elements (content fields)**

<table>
<thead>
<tr>
<th>Data name</th>
<th>Item (field)</th>
<th>Field name in Chinese</th>
<th>Field measure unit</th>
<th>Field code description</th>
<th>Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>DEWP_MEAN</td>
<td>Value</td>
<td>月平均露点</td>
<td>Fahrenheit degree</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

   iii. **Temporal cover**

   1989–2018

   iv. **Spatial cover**

   South Asia: India, Bangladesh, Pakistan, Sri Lanka, Nepal, Bhutan; Southeast Asia: Indonesia, Thailand, Malaysia, Philippines, Vietnam, Myanmar, Cambodia, Laos.

II. **Subject/industry scope of dataset/atlas**

   i. **Subject scope**
   
   Earth science

   ii. **Industry scope**
   
   Heat wave service

   iii. **Other classifications (optional)**

III. **Accuracy of dataset/atlas**

   i. **Time frequency**

   1 month

   ii. **Spatial reference, accuracy, and granularity**

   Spatial reference: GCS_WGS_1984

   Accuracy: 1 time

   Spatial resolution: 0.1 degree * 0.1 degree

   Granularity: station

IV. **Dataset/atlas storage management**

   i. **Data quantity**

   2.55GB

   ii. **Type format**

   The data set is stored on hard disk, and the data structure type is raster data.
iii. Update management
Updated from time to time.

V. Quality control of the dataset/atlas
i. Production mode
The data set is calculated and interpolated from meteorological station data.

ii. Data sources (condition selection)
NOAA Meteorological Station Data

iii. Methods of the data acquisition and processing (condition selection)
The research team processed the daily weather station data into monthly data, and then interpolated by Kriging to form raster data covering the entire study area.

VI. Sharing and usage method of the dataset/atlas
i. Sharing methods and restrictions
Fully shared

ii. Contact information of the sharing service (condition selection)
The service is as follows:
Name: Yang fei
Mailing address: A11 Datun Road, Chaoyang District, Beijing
Zip code: 100101
E-mail: yangfei@lreis.ac.cn

iii. Conditions and methods of usage
Use ArcGIS, ENVI and other software to open.

VII. Intellectual property rights of the dataset/atlas
i. Property rights (optional)
“Monthly average dew point monitoring data set in south and southeast Asia(1989-2018)” owned by institute of geographic sciences and natural resources research, CAS.

ii. Reference method of the dataset/atlas

iii. Usage contacts of the datasets/atlas
Contact person
Name: Yang fei
Mailing address: A11 Datun Road, Chaoyang District, Beijing
Zip code: 100101
E-mail: yangfei@lreis.ac.cn

VIII. Others (optional)
In addition to the above, other information must also be explained.
